Pakistani School Ajman / Ajman /
2020

BS COMPUTER SCIENCE

Capital University Of Science And
Technology Islamabad / 2025

PERSONAL
DETAILS

Date of birth:

13 Apr 2001

Nationality:

Pakistani

Visa status:

UAE Resident

Marital status:

Single

WORK EXPERIENCE

High Tech Software
House

Oct 2025 - Nov 2025
Rawalpindi

● ANDROID APP DEVELOPMENT INTERN

- Developed Android applications using Kotlin, enhancing user experience and interface design.
- Gained real-world exposure to application development processes and industry-standard practices during internship.
- Maintained Android applications, ensuring optimal performance through continuous updates and refinements.

Willow's Ventures

Aug 2025 - Sep 2025
Rawalpindi

● JUNIOR WEB DEVELOPER

- Developed and maintained user-friendly website interfaces using HTML, CSS, and JavaScript to enhance user experience.
- Implemented responsive design principles to ensure websites were accessible on various devices, improving accessibility for a broader audience.
- Collaborated with senior developers to integrate back-end functionalities with front-end designs, streamlining website performance.

iGate Technologies

Jan 2026 - Mar 2026
Islamabad

● IT INTERN (FLUTTER)

- Developed a custom Shopify mobile application using Flutter.
- Integrated Shopify Storefront API using GraphQL for product and customer data.
- Implemented product listing, cart, and checkout features.
- Optimized API calls and improved app performance.

PROJECTS

Mar 2024 - Jun 2025

● CAR-PAL (CARPOOLING APP)

- Built carpooling app using Flutter & Firebase
- Integrated Google Maps for real-time tracking
- Implemented map-based ride selection
- Added emergency live location feature
- Enabled gender-based ride options

Jan 2026 - Mar 2026

● SHOPIFY MOBILE APP

- Built a custom Shopify mobile storefront app using Flutter.
- Consumed Shopify Storefront API using GraphQL queries to retrieve products, collections, and customer data.
- Implemented product browsing, product detail pages, and cart features.
- Managed API authentication and structured GraphQL queries for efficient data fetching.

● NEWS APP (FLUTTER)

- Developed a news application using Flutter to display real-time news from multiple categories.
- Integrated REST APIs for fetching and updating news articles dynamically.
- Implemented responsive UI, smooth navigation, and article bookmarking.

Tech: Flutter, Dart, REST API

● QA SKILLS

- Basic knowledge of Manual Testing and Test Case Writing
- Learning Selenium with Python for Automation Testing
- Practicing web automation (login, forms, validations)
- Familiar with bug identification and reporting
